

CS 3600 Intraoral Scanner: NOW COMPATIBLE WITH EXCEED

Add best-in-class CAD/CAM technology and trueness to your impression workflow

It's official! The CS 3600 is now certified with eXceed. To help you secure excellent clinical results in less time, eXceed has developed a patented suite of computer-aided services and orthodontic software for aligners design and precision bracket placement. Enjoy significant cost savings over traditional aligners, and redefine your workflow with these impressive benefits:

- Reduce chair time and enjoy a simple, smooth and efficient user experience with high-speed continuous scanning
- Boost the efficiency and quality of your scanning, thanks to real-time scanning feedback that guides you throughout the acquisition process
- Improve patient education and case acceptance with vibrant, HD 3D color images and models from our Orthodontic software module, CS Model
- Facilitate a wide range of clinical applications with dedicated workflows for restorations, orthodontics and implants

**Three interchangeable tips
styles available that can be
autoclaved up to 60 times.**

WORKFLOW INTEGRATION | HUMANIZED TECHNOLOGY | DIAGNOSTIC EXCELLENCE
